

### Brief description :

CDNET Telephone / ISDN Category 3 patch panel is high-density telecommunication panel with 25, 50 standard RJ45 jacks. The panel meets all latest standards and electrical parameters and is designed for termination of two pair cable on Krone termination blocks. Printed circuit board together with high quality components ensures the Category 3 performance. Integrated back cable management for separate cables provides organized and secure installation.

### Feature :

1. 110&Krone punch down tools are available..
2. Print circuit board together with high quality components ensures the Category 3 performance.
3. Offers total solution of your Local Networking Area.
4. All versions can be mounted on 19" EIA racks.
5. All ports are numerically identified.

### Standards Compliance :

- ANSI/TIA/EIA 568B Category 3
- ISO/IEC 11801
- EN 50173-1

## Application :

Suitable for voice applications

Analog voice and digital voice (VoIP)

Analog (broadband, baseband) and Digital video.
